

## Sparrows & Wrens

### Week Beginning 21/01/2024

### What we are learning about:

This week we are continuing to think about space, and are continuing to learn the names of the planets and a little bit about each of them!

We will be then look at if we think aliens exist, before designing our own aliens - ready to make them next week ready to show you at our space parent event!

We will also be reading aliens love underpants and exploring the story in lots of ways.

We have been working really hard on remembering our number bonds to 5 in lots of different ways and will continue with this this week - we find  $5+0=5$  and  $0+5=5$  really tricky to grasp!

Wanderlust will be starting back up for the year with us thinking about hibernation! We will look at what animals hibernate in England and how we can help them, as well as making bird feeders to hang in our area as food can be sparse for birds in winter.

## Number of the Week

### Number bonds to 5

## Sounds of the Week

RWI groups

### Ideas for at home:

Talk about what children know about space and what new things they have found out about.

Continue to talk about the moon and what it looks like in the night sky. Fill in children's moon diaries, or you can take photos of the moon and send them into us on seesaw! (which we will look at with children in class).

Help children to practice recognising and writing their sounds to be able to do this independently.

Help children to read their RWI book bag books, and share reading for pleasure books together.

Ask children to help you find 'five' and see if they can tell you any numbers that go together to make 5!

Look out and remind children to be careful in places animals might be hibernating (e.g. the woods)
