

Physical Education and School Sport

PE and school sport has had a successful year. The number of children taking part in extra-curricular physical activity has risen significantly and PE lessons have become more focused. Developing the teaching of PE, increasing the amount of extra-curricular physical activity our children take part in and engaging a wider range of groups within school have been priorities.

Ensuring that 100% of PE lessons are at least good or outstanding.

5277 additional hours of physical activity done last year

Ensuring that 100% of children identified as bottom 20% for low engagement, engage in extra-curricular physical activity in every term.

Sam Stevenson came into school to work with the staff and deliver CPD. The focus was reviving the Real PE structure with practitioners, familiarisation with the teaching sequences (this was practical) and assessment wheel training. Following the training, RH has continued to work individually with staff to develop confidence and skills in delivering Real PE. The pattern of delivery was prioritised from staff responses in the spring response document. Staff completed the first round of assessment in the summer term. This was used as a baseline for classes going forward.

Ensuring that at least 50% of pupils are engaged in extracurricular Sporting and physical activity.

Our children have been involved in both national and international projects with The Royal Ballet and The Rugby League World Cup. We continue to make links and work with specialists from the local community such as Hill House and The Doncaster Legacy Project. We continue to build our cultural capital and broaden the profile of our school and the range of opportunities available to our children.

Performing the Siva Tau at the Eco-Power Stadium

11/12 (91.7%) classes had more than 50% of the class taking up addition physical activity over the course of the year.

There is a strong trend showing increased participation in additional physical activity taken up as children move up the school.

In 11/12 (91.7%) of classes all SEND children accessed additional physical activity throughout the year. In the one class where this was not the case, there have been extenuating circumstances.

Scotty's Heroes is used to ensure 100% of children identified as bottom 20% for engagement and those with social and communication needs are prioritised and targeted for intervention.
