

What we are learning about:

This week we will be continuing our learning around 'out of this world'

We will look at the moon landing, and talking about that being in the past, and how we can tell this from the videos.

We will then delve deeper into thinking about the moon, and answering children's questions of 'can you live on the moon?' and 'is the moon a circle?'

We will create rockets in lots of different ways, role play being astronauts in a rocket, engage in small world play around rockets and the moon landing.

All of us will be designing and then creating our own rockets too!

Sparrows & Wrens Week Beginning 2/3/2026

Maths

This week we will be focusing on doubling.

We will keep reminding ourselves that 'doubling is the same again' and looking at how to do this in lots of different ways!

We will apply what we already know to our mathematical thinking, to solve problems and work out.

Phonics

NEW RWI GROUPS

All children will continue in their new groups this week.

We will change books on TUESDAY

At home you could:

Practice red word keyrings and new RWI books.

Share reading for pleasure books together, asking children questions about the story to check they understand.

Look in the sky at night and see what you notice!

Encourage children to dress themselves and pick out what they need for the weather.

See what you can find out about space -or send in questions on seesaw that children want to find out!

Talk about gravity, and notice when things fall/hold your own ramp experiment to see what goes down a hill/ramp fastest and talk about why.

Notes for the week:

If you have and junk/recycling please bring it in to help us make our rocket creations!

Friday is World Book Day - Children are invited to school as either a story character, or in non-uniform with their favourite book. - please label anything that children bring or come in!
